IGCSE 0607 Practice Questions — E1.8

Standard form

Total Questions: 6 — **Total Marks:** 29 Marks

Table of Contents & Quick Navigation

- **E1.8** Standard form
  → **Paper 2 (Non-Calculator)** *(3 Qs)* · **Paper 4 (Calculator)** *(3 Qs)*

---

1 **(a)** Write 450000 in standard form.

..... **[1]**

(b) Write 3.08×10^{-4} as an ordinary number.

..... **[1]**

(c) Work out.

$(2 \times 10^3) \times (4 \times 10^5)(0)$

Give your answer in standard form.

..... **[1]**

2 The mass of the Earth is 5.97×10^{24} kg.
The mass of the Moon is 7.35×10^{22} kg.

(a) Calculate the difference between the mass of the Earth and the mass of the Moon.
Give your answer in standard form.

..... kg **[2]**

(b) The mass of the Sun is 1.99×10^{30} kg.
Find the value of k when

mass of the Sun = k ×mass of the Earth
Give your answer to 3 significant figures.

$k =$ ..... **[3]**

3 Consider the following numerical values.

(a) Convert the following numbers as instructed.

(i) Write 0.00034 in standard form.

..... **[1]**

(ii) Write 5.2×10^4 as an ordinary number.

..... **[1]**

(b) Work out, giving your answer in standard form:

$(2 \times 10^3) \times (4 \times 10^5)$

..... **[2]**

4 **(a)** Calculate, giving your answer in standard form.

$3.4 \times 10^7 + 2.1 \times 10^6$

..... **[2]**

(b) A computer can do a calculation in 4×10^{-9} seconds.
Work out how many of these calculations the computer can do in 5 minutes.
Give your answer in standard form.

..... **[3]**

5 The mass of the Sun is 1.99×10^{30} kg.
The mass of Jupiter is 1.90×10^{27} kg.

(a) Calculate how many times greater the mass of the Sun is than the mass of Jupiter.
Give your answer in standard form correct to 3 significant figures.

..... **[3]**

(b) A comet has a mass of 4.5×10^{13} kg.
Calculate the mass of the comet in grams.
Give your answer in standard form.

..... g **[2]**

6 A large cylindrical water tank has a base radius of 4.5×10^2 cm and a height of 1.2×10^3 cm.

(a) Calculate the volume of the water tank in cm^3.
Give your answer in standard form correct to 4 significant figures.

..... cm^3 **[3]**

(b) The empty tank is being filled with water at a constant rate of 1.5×10^{-4} m^3 per second.
Note that $1\ m^3 = 1 \times 10^6\ cm^3$.

Calculate the time taken to fill the tank completely.
Give your answer in hours, written in standard form correct to 3 significant figures.

..... hours **[4]**
