IGCSE 0607 Practice Questions — E6.1

Units of measure

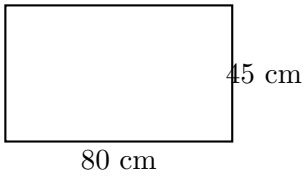

Total Questions: 6 — **Total Marks:** 39 Marks

Table of Contents & Quick Navigation

- **E6.1** Units of measure
  → **Paper 2 (Non-Calculator)** *(2 Qs)* · **Paper 4 (Calculator)** *(4 Qs)*

---

1 A rectangular piece of card and a water jug are being measured.

(a) Calculate the area of the rectangular piece of card in square metres (m^2).

..... m^2 **[2]**

(b) The jug holds 3.2 litres of water.
Write down this volume in cm^3.

..... cm^3 **[1]**

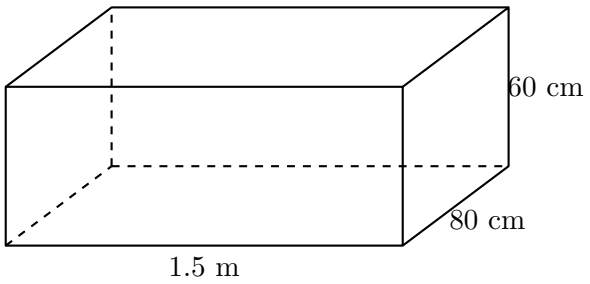

2 **(a)** Change 3.5 m^2 into cm^2.

..... cm^2 **[1]**

(b) A rectangular tank measures 60 cm by 45 cm by 30 cm.
Calculate the volume of the tank in litres.

..... litres **[3]**

3 A metal water tank is made in the shape of a cuboid.

(a) Calculate the capacity of the water tank in litres.

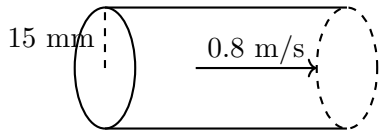

..... litres **[3]**

(b) A solid metal sphere is melted down to make the tank.
The metal sphere has a volume of 0.024 m^3.
The mass of 1 cm^3 of this metal is 7.8 g.

Calculate the total mass of the sphere, giving your answer in kilograms.

..... kg **[3]**

4 Water flows through a cylindrical pipe into an empty rectangular pool.
The pool measures 4 m by 2.5 m.

(a) The cylindrical pipe has a radius of 15 mm.
Water flows through the pipe at a speed of 0.8 m/s.

Show that the volume of water flowing out of the pipe in one second is 0.565 litres, correct to 3 significant figures.

[3]

(b) Calculate the time taken for the depth of water in the pool to reach 1.2 m.
Give your answer in hours and minutes, correct to the nearest minute.

..... hours ..... minutes **[4]**

5 During a storm, 15 mm of rain falls on a flat rectangular roof measuring 15 m by 12 m.

(a) Calculate the volume of rain that falls on the roof.
Give your answer in litres.

..... litres **[3]**

(b) The water from the roof flows into a cylindrical tank with a base radius of 60 cm.
Calculate the increase in the depth of the water in the tank.
Give your answer in centimetres, correct to 1 decimal place.

..... cm **[4]**

6 Water flows through a cylindrical pipe of radius 2.5 cm at a speed of 18 km/h.

(a) Calculate the volume of water, in litres, that flows through the pipe in 1 minute.

..... litres **[5]**

(b) The water from the pipe is used to fill an empty rectangular reservoir measuring 50 m by 30 m by 4 m.
Calculate the time it takes to fill the reservoir completely.
Give your answer in days and hours, correct to the nearest hour.

days ..... , hours ..... **[7]**
