IGCSE 0607 Practice Questions — E6.5

Compound shapes and parts of shapes

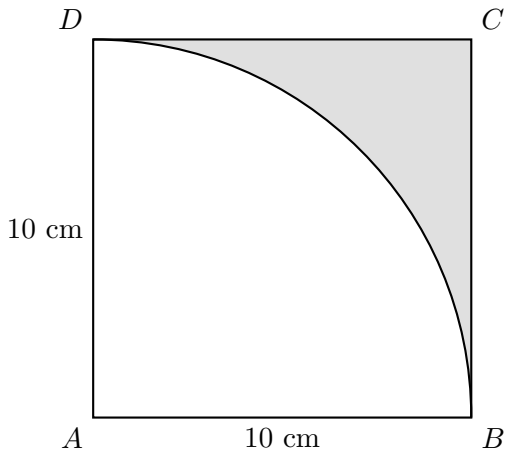

Total Questions: 6 — **Total Marks:** 43 Marks

Table of Contents & Quick Navigation

- **E6.5** Compound shapes and parts of shapes
  → **Paper 2 (Non-Calculator)** *(2 Qs)* · **Paper 4 (Calculator)** *(4 Qs)*

---

1 The diagram shows a square $ABCD$ with side length 10 cm.
A quarter circle with center A and radius 10 cm is drawn inside the square.
The region inside the square but outside the quarter circle is shaded.

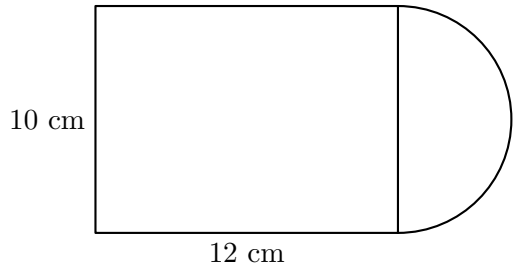

(a) Find the exact perimeter of the shaded region.
Give your answer in terms of π.

..... cm **[2]**

(b) Find the exact area of the shaded region.
Give your answer in terms of π.

..... cm^2 **[2]**

2 The diagram shows a compound shape made from a rectangle and a semicircle.
The rectangle has length 12 cm and width 10 cm.
The semicircle has a diameter of 10 cm.

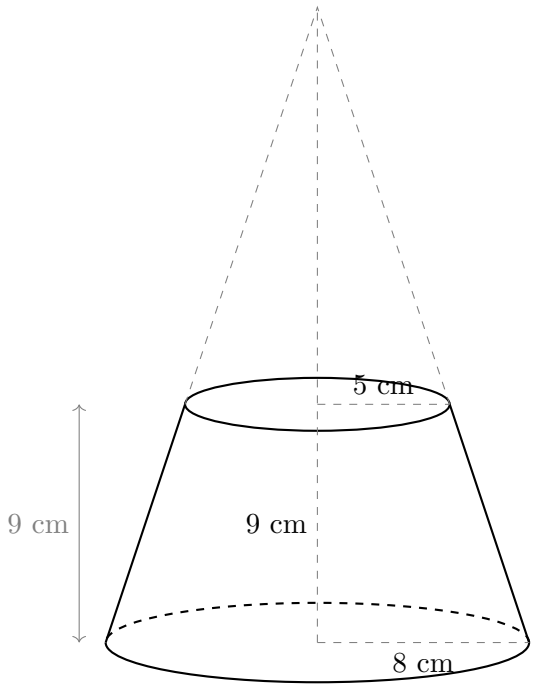

(a) Calculate the perimeter of the shape.
Give your answer in the form $a + b\pi$.

..... cm **[3]**

(b) Calculate the area of the shape.
Give your answer in the form $c + d\pi$.

..... cm^2 **[3]**

3 The diagram shows a solid frustum.
The frustum is made by removing a smaller cone from a larger cone.
The larger cone has a base radius of 8 cm and a vertical height of 24 cm.
The smaller cone has a base radius of 5 cm and a vertical height of 15 cm.

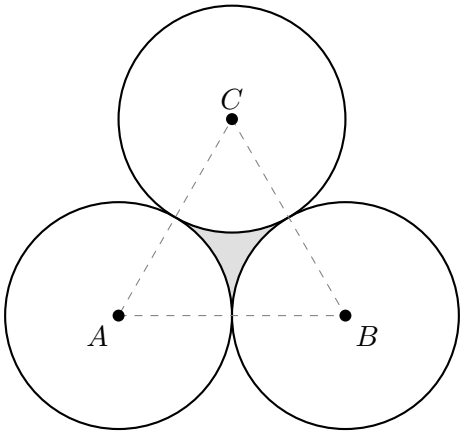

(a) Calculate the volume of the solid frustum.

..... cm^3 **[3]**

(b) Calculate the total surface area of the solid frustum.

..... cm^2 **[5]**

4 The diagram shows three identical circles, each of radius r cm.
The circles touch each other externally.
The region enclosed between the three circles is shaded.

(a) Show that the area of the shaded region, A, is given by the formula

$$A = r^2\left(\sqrt{3} - \frac{\pi}{2}\right)$$

[4]

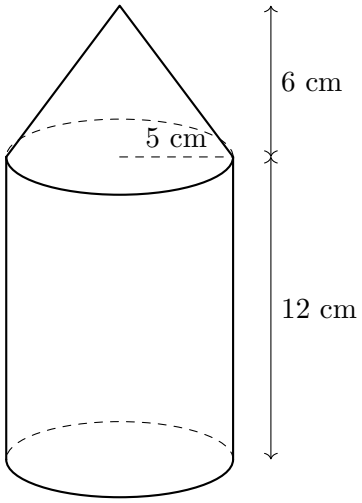

(b) The area of the shaded region is 15 cm^2.
Work out the value of r.

$r =$ ..... **[3]**

(c) Calculate the total perimeter of the shaded region.

..... cm **[3]**

5 The diagram shows a solid compound shape made from a cylinder and a cone.
The cylinder and the cone both have a base radius of 5 cm.
The height of the cylinder is 12 cm and the height of the cone is 6 cm.

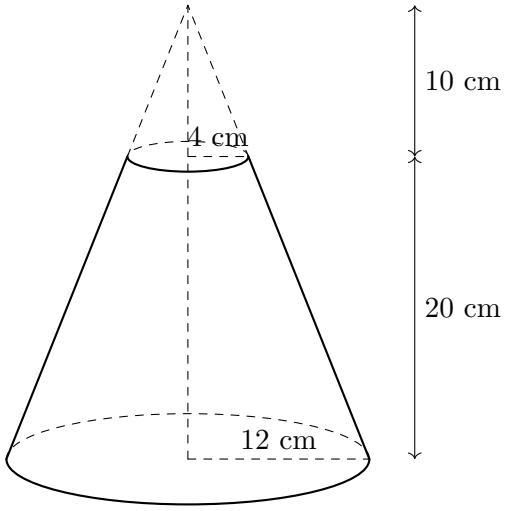

(a) Calculate the volume of the solid.

..... cm^3 **[3]**

(b) Calculate the total surface area of the solid.

..... cm^2 **[4]**

6 The diagram shows a solid metal frustum.
The frustum is formed by removing a small cone of height 10 cm from a larger cone.
The radius of the circular base of the frustum is 12 cm and the radius of the circular top is 4 cm.
The height of the frustum is 20 cm.

(a) Calculate the volume of the solid frustum.

..... cm^3 **[4]**

(b) Calculate the total surface area of the solid frustum.

..... cm^2 **[4]**
