IGCSE 0607 Practice Questions — E9.1

Introduction to probability

Total Questions: 9 — **Total Marks:** 50 Marks

Table of Contents & Quick Navigation

- **E9.1** Introduction to probability
  → **Paper 2 (Non-Calculator)** *(6 Qs)* · **Paper 4 (Calculator)** *(3 Qs)*

---

1 Event A is that a train arrives on time.

$P(A) = 0.83$

(a) Work out $P(A')$.

..... **[1]**

(b) State in words what the event A' represents.

..... **[1]**

2 A biased spinner can land on 1, 2, 3, 4, or 5.
The table shows the probabilities of the spinner landing on each of the numbers.

Outcome	1	2	3	4	5
Probability	0.15	$2x$	0.31	x	0.24

(a) Find the value of x.

$x =$ ..... **[2]**

(b) The spinner is spun once.
Find the probability that it does not land on 2.

..... **[2]**

3 A biased spinner can land on Red, Blue, Green, or Yellow.
The table shows the probabilities of the spinner landing on Red, Blue, and Green.

Colour	Red	Blue	Green	Yellow
Probability	0.15	0.3	0.45	

(a) Work out the probability that the spinner lands on Yellow.

..... **[2]**

(b) Work out the probability that the spinner lands on Red or Blue.

..... **[1]**

(c) Let G be the event that the spinner lands on Green.
Find $P(G')$.

$P(G') =$ ..... **[2]**

4 A biased spinner can land on 1, 2, 3 or 4.
The table shows the probabilities of the spinner landing on each number.

Number	1	2	3	4
Probability	$\frac{1}{5}$	0.35	x	$2x$

(a) Work out the value of x.

$x =$ ..... **[2]**

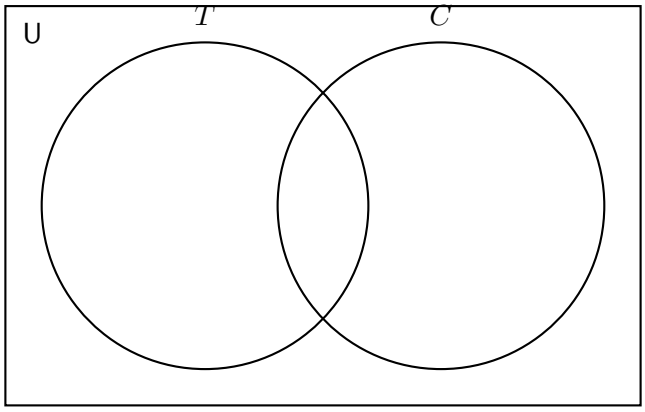

(b) Find the probability that the spinner does not land on 4.

..... **[2]**

5 In a group of 60 people, some like tea (T) and some like coffee (C).

- The total number of people who like tea is 38.
- The total number of people who like coffee is 24.
- The number of people who like neither is x.
- The number of people who like both is $2x$.

(a) Use this information to complete the Venn diagram in terms of x.

[3]

(b) Find the value of x.

$x =$ ..... **[2]**

(c) A person is chosen at random from the group.
Find $P(T \cap C')$.

$P(T \cap C') =$ ..... **[2]**

6 A bag contains only red counters, blue counters, and green counters.
The number of red counters is x^2.
The number of blue counters is $3x$.
The number of green counters is 2.

(a) Write down an expression, in its simplest form, for the total number of counters in the bag.

..... **[1]**

(b) A counter is chosen at random.
The probability that it is red is $\frac{8}{15}$.
Show that $7x^2 - 24x - 16 = 0$.

[2]

(c) Solve the equation $7x^2 - 24x - 16 = 0$ to find the value of x.

$x =$ ..... **[3]**

(d) Find the probability that a randomly chosen counter is not blue.
Give your answer as a fraction in its simplest form.

..... **[2]**

7 A bag contains only red marbles, blue marbles, and green marbles.
The probability of choosing a red marble at random is $\frac{2}{5}$.
The probability of choosing a blue marble at random is $\frac{1}{3}$.
There are 12 green marbles in the bag.

(a) Calculate the probability of choosing a green marble at random.

..... **[2]**

(b) Calculate the total number of marbles in the bag.

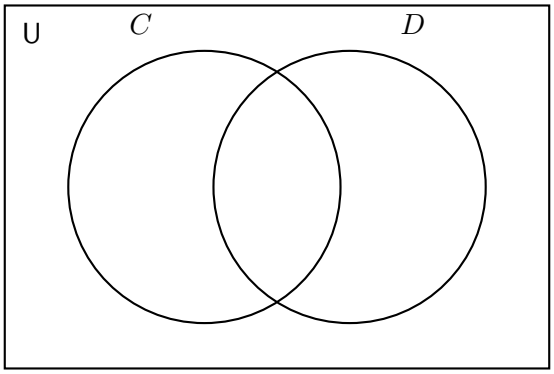

..... **[3]**

(c) Write down the probability that a marble chosen at random is not blue.

..... **[1]**

8 A group of 120 people were asked about the pets they own.
$C = \{\text{people who own a cat}\}$
$D = \{\text{people who own a dog}\}$
$n(\mathsf{U}) = 120$
$n(C) = 55$
$n(D) = 68$
18 people own neither a cat nor a dog.

(a) Complete the Venn diagram to show the number of people in each region.

[3]

(b) A person is chosen at random.
Find $P(C \cap D)$.

..... **[1]**

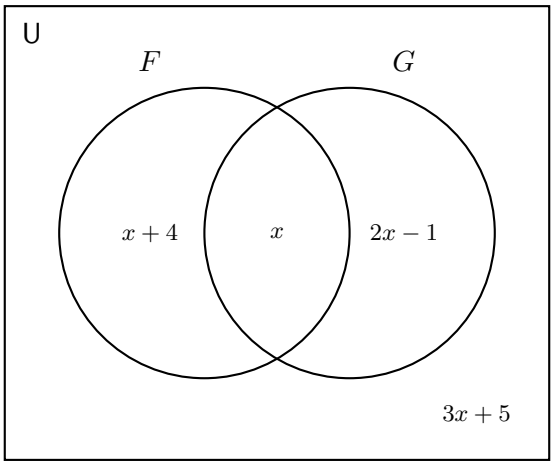

(c) Find $P(D')$.

..... **[2]**

(d) Find the probability that a person chosen at random owns a cat or a dog, but not both.

..... **[2]**

9 The Venn diagram shows information about the number of students in a class of 50 who study French (F) and German (G).

(a) Work out the value of x.

$x =$ ..... **[2]**

(b) A student is chosen at random.
Find $P(F')$.

..... **[2]**

(c) A student is chosen at random.
Find the probability that this student studies exactly one of these languages.

..... **[2]**
