IGCSE 0607 Practice Questions — E2.1

Introduction to algebra

Total Questions: 9 — **Total Marks:** 44 Marks

Table of Contents & Quick Navigation

- **E2.1** Introduction to algebra
  → **Paper 2 (Non-Calculator)** *(6 Qs)* · **Paper 4 (Calculator)** *(3 Qs)*

---

1 Find the value of $3a - 2b$ when $a = 4$ and $b = -5$.

..... **[2]**

2 Given the formula $v = u + at$.

Find the value of v when $u = 5$, $a = -2$, and $t = 3$.

$v =$ ..... **[3]**

3 **(a)** Work out the value of $5x - 2y$ when $x = 3$ and $y = -4$.

..... **[2]**

(b) Evaluate

$$\frac{a^2 - b^3}{2c}$$

when $a = -4$, $b = 2$ and $c = 3$.

..... **[2]**

4 (a) (a) The cost of hiring a plumber is calculated using the formula

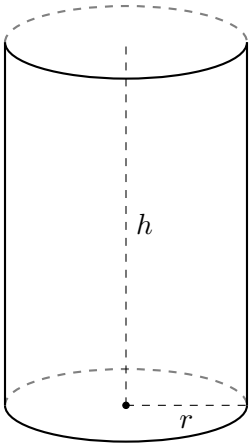

$C = 40 + 25h$ where C is the cost in dollars and h is the number of hours worked.
Work out the cost of hiring a plumber for 3.5 hours.

$C = \$ \ldots\ldots\ldots\ldots\ldots$ **[2]**

(b) Given that $v = u + at$, find the value of v when $u = -12$, $a = 9.8$ and $t = 3$.

$v = \ldots\ldots\ldots\ldots\ldots$ **[3]**

5 A cylindrical container of radius r and height h is open at the top.
The total exterior surface area of the container, A, consists of the curved surface area and the circular base.

(a) Show that the total surface area A can be written as

$$A = \pi r(2h + r)$$

[2]

(b) **(i)** Calculate the exact surface area A when $r = 4$ and $h = 6$.
Give your answer in terms of π.

$A =$ ..... **[2]**

(ii) The volume of the cylinder is V.
The formula for the volume is $V = \pi r^2 h$.
Express h in terms of V, π and r, and substitute this into the expression for A to show that

$$A = \frac{2V}{r} + \pi r^2$$

[3]

6 Consider the expression $P = \dfrac{2x^2 - 3y}{x - y}$.

(a) Calculate the value of P when $x = -2$ and $y = 4$.

$P =$ ..... **[3]**

(b) Rearrange the formula to make y the subject.

$y =$ ..... **[4]**

7 The cost, C dollars, of hiring a plumber for h hours is given by the formula:

$C = 45 + 35h$

(a) Calculate the cost of hiring the plumber for 3.5 hours.

$C =$ ..... **[2]**

(b) The plumber charges a total of \$325 for a job.
Calculate the number of hours the plumber worked.

$h =$ ..... hours **[3]**

8 The volume, V, of a spherical cap of height h and base radius a is given by the formula

$$V = \frac{1}{6}\pi h(3a^2 + h^2)$$

(a) Calculate the volume of a spherical cap with height $h = 4.2$ cm and base radius $a = 6.5$ cm. Give your answer correct to 1 decimal place.

$V =$ ..... cm^3 **[2]**

(b) Rearrange the formula to make a^2 the subject.

$a^2 =$ ..... **[3]**

(c) Find the base radius, a, of a spherical cap with volume $V = 150$ cm^3 and height $h = 3$ cm. Give your answer correct to 3 significant figures.

$a =$ ..... cm **[1]**

9 A formula used in physics is

$$s = ut + \frac{1}{2}at^2$$

(a) **(a)** Calculate the value of s when $u = 5.2$, $t = 4.5$ and $a = -9.8$.

$s =$ ..... **[2]**

(b) Calculate the positive value of t when $s = 40$, $u = 15$ and $a = -9.8$.

$t =$ ..... **[3]**
