IGCSE 0607 Practice Questions — E1.2 — Combined Questions & Markscheme

Sets

Total Questions: 12 — **Total Marks:** 72 Marks

Table of Contents & Quick Navigation

- **E1.2** Sets
  → **Paper 2 (Non-Calculator)** *(5 Qs)* · **Paper 4 (Calculator)** *(7 Qs)*

1 $\mathsf{U} = \{x : x \text{ is an integer and } 1 \leq x \leq 10\}$
$A = \{x : x \text{ is a prime number}\}$
$B = \{x : x \text{ is a factor of } 12\}$

(a) List the members of set A.

..... **[1]**

(b) List the members of set B.

..... **[1]**

(c) Find $n(A \cup B)$.

..... **[1]**

(d) Write down the elements of $A \cap B$.

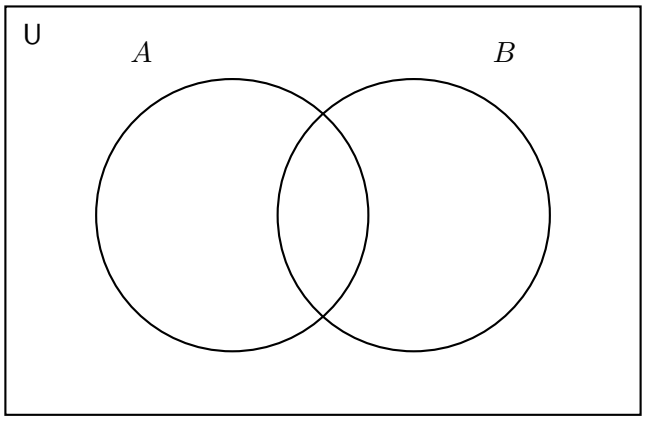

..... **[1]**

(e) Write down a number that is in U but is not in $A \cup B$.

..... **[1]**

2 Let U be the set of integers from 1 to 10 inclusive.
Let A be the set of prime numbers.
Let B be the set of odd numbers.

(a) Complete the Venn diagram to show the elements of these sets.

[2]

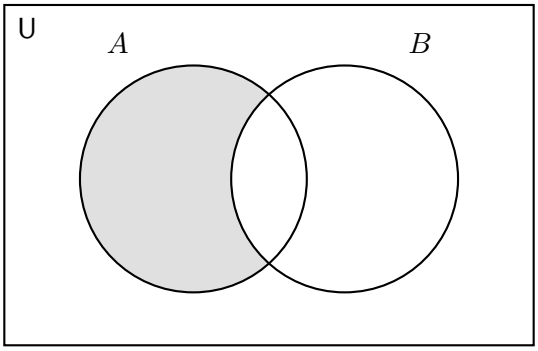

(b) List the elements of $A \cap B'$.

..... **[1]**

(c) Find $n(A \cup B)$.

..... **[1]**

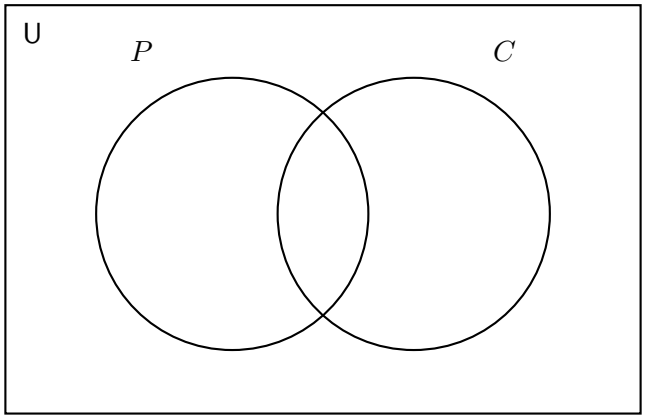

(d) Write down the set notation for the shaded region in the Venn diagram above.

..... **[1]**

3 There are 45 students in a class.
Let U be the set of students in this class.
Let P be the set of students who study Physics.
Let C be the set of students who study Chemistry.
$n(P) = 28$
$n(C) = 22$
$n(P \cap C) = x$
$n((P \cup C)') = 4$

(a) Complete the Venn diagram in terms of x.

[2]

(b) Form an equation in x and solve it to find the value of x.

$x =$ ..... **[2]**

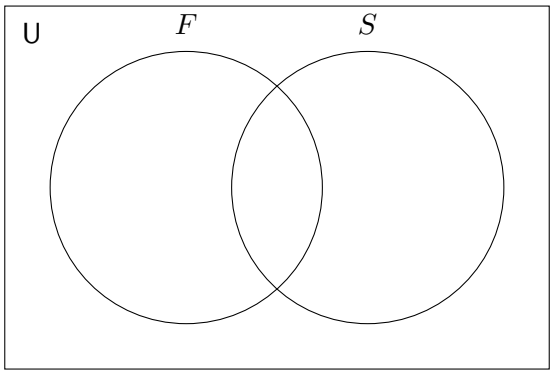

(c) Find $n(P \cap C')$.

..... **[1]**

4 In a class of 40 students:

- 25 study French (F)
- 18 study Spanish (S)
- 5 study neither French nor Spanish

(a) Complete the Venn diagram to show this information.

[3]

(b) Find $n(F \cap S')$.

..... **[1]**

(c) A student is chosen at random from the class.
Find the probability that they study exactly one of the two languages.

..... **[2]**

(d) Two students are chosen at random from those who study French.
Find the probability that both also study Spanish.

..... **[1]**

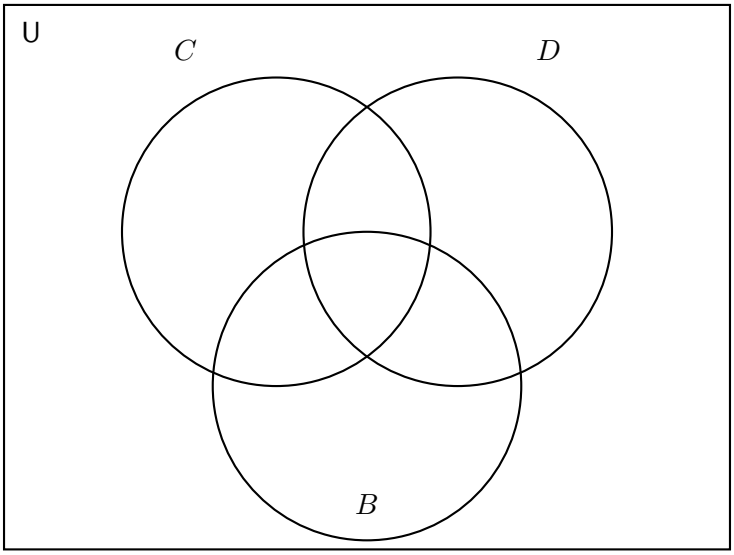

5 In a survey of 100 people, information was collected about the pets they own.

Let U be the set of people surveyed.
Let C be the set of people who own a cat.
Let D be the set of people who own a dog.
Let B be the set of people who own a bird.

- 8 people own all three pets.
- 12 people own a cat and a dog but not a bird.
- 7 people own a cat and a bird but not a dog.
- 10 people own a dog and a bird but not a cat.
- 3 people do not own any of these pets.

The number of people who own only a cat is x.
The number of people who own only a bird is also x.
The number of people who own only a dog is $2x$.

(a) Complete the Venn diagram to show this information.

[3]

(b) Find the value of x.

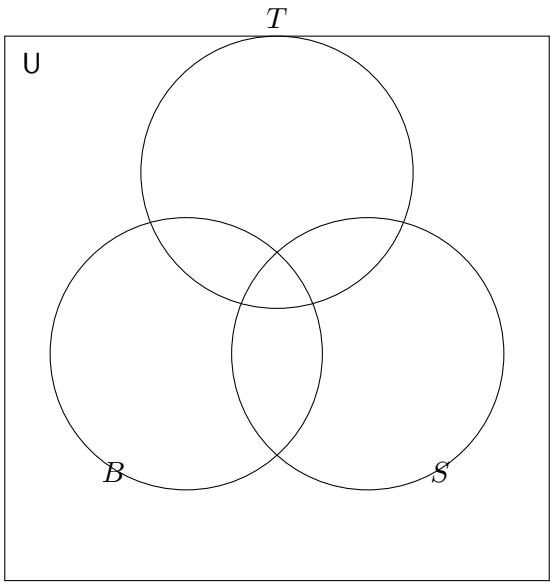

$x =$ ..... **[2]**

(c) Find $n((C \cup D) \cap B')$.

..... **[2]**

6 There are 60 people in a sports club.

- 30 play Tennis (T)
- 28 play Badminton (B)
- 25 play Squash (S)
- 12 play both Tennis and Badminton
- 9 play both Tennis and Squash
- 11 play both Badminton and Squash
- 4 play all three sports

(a) Complete the Venn diagram.

[3]

(b) Find $n(T \cup B \cup S)'$.

..... **[1]**

(c) Find $n(T \cap (B \cup S))$.

..... **[1]**

(d) Use set notation to describe the region containing the number 9 (the number of people who play Badminton only).

..... **[2]**

7 The universal set U and sets P and F are defined as follows:

- $\mathsf{U} = \{x : x \text{ is an integer} 1 \leq x \leq 10\}$
- $P = \{x : x \text{ is a prime number}\}$
- $F = \{x : x \text{ is a factor of } 18\}$

(a) Write down the elements of set F.

$F = \{$ ..... $\}$ **[1]**

(b) List the elements of $P \cap F$.

$P \cap F = \{$ ..... $\}$ **[1]**

(c) Find $n((P \cup F)')$.

..... **[2]**

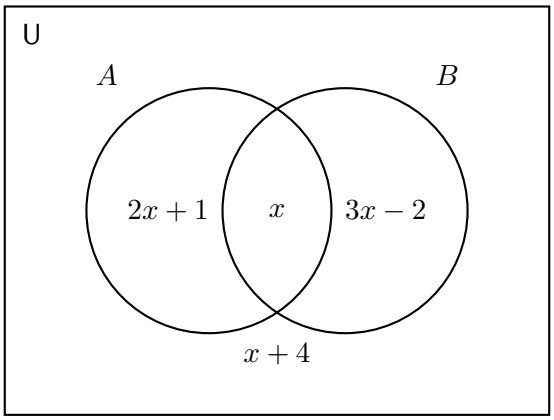

(d) Write down the correct set symbol, $\in$ or $\notin$, to make this statement true:

$5 \ldots\ldots F$

[1]

8 The Venn diagram shows the number of elements in sets A and B, in terms of x.

U is the universal set and $n(\mathsf{U}) = 52$.

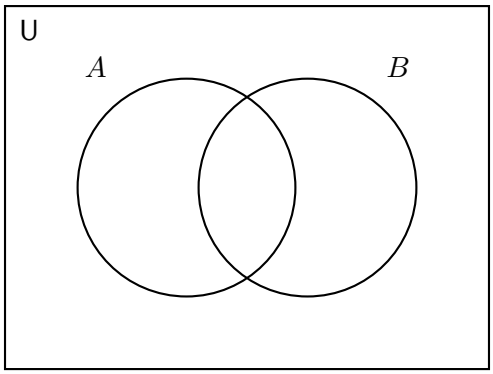

(a) Form an equation in x and solve it.

$x =$ ..... **[3]**

(b) Find $n(A \cup B')$.

..... **[2]**

(c) On the Venn diagram below, shade the region $A \cap B'$.

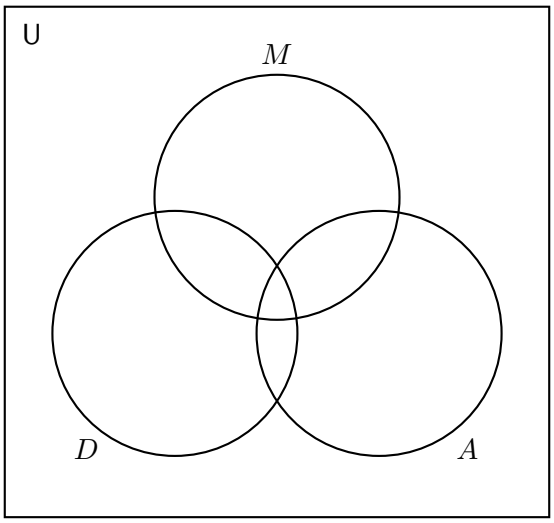

[1]

9 In a year group of 120 students, they can choose to study Music (M), Drama (D), and Art (A).

- 12 students study all three subjects.
- 25 students study Music and Drama.
- 32 students study Drama and Art.
- 28 students study Music and Art.
- 50 students study Music.
- 65 students study Drama.
- x students study Art only.
- 15 students study none of these three subjects.

(a) Use this information to complete the Venn diagram.

[3]

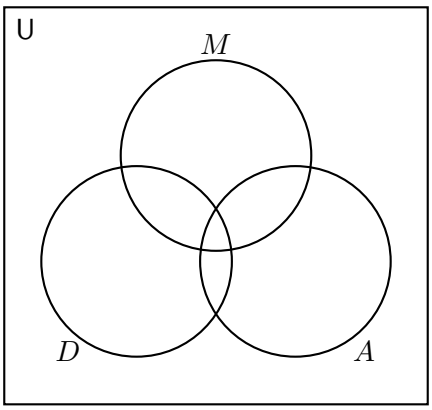

(b) Find the value of x.

$x =$ ..... **[2]**

(c) Find $n(M \cup (D \cap A))$.

..... **[2]**

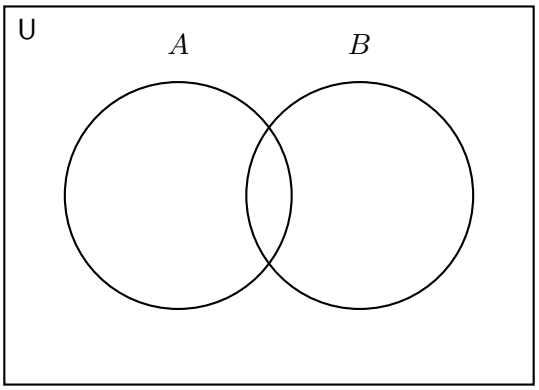

(d) On the Venn diagram below, shade the region $M \cap (D \cup A)'$.

[1]

10 The universal set U contains all integers from 1 to 10 inclusive.
Set A contains all the even numbers in U.
Set B contains all the prime numbers in U.

(a) Complete the Venn diagram to show the elements of these sets.

[2]

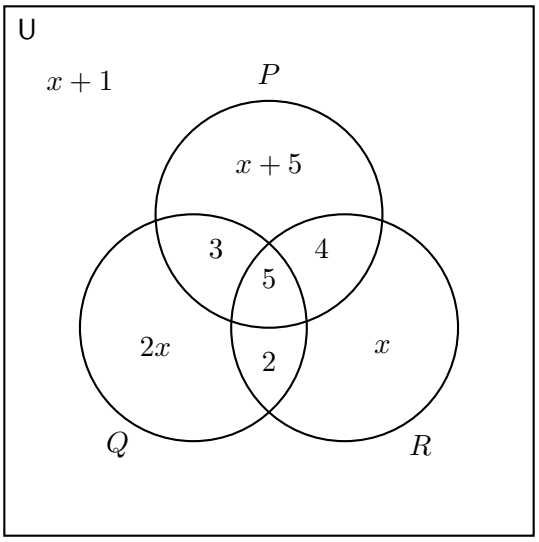

(b) List the elements of $A \cap B$.

..... **[1]**

(c) Find $n(A \cup B)'$.

..... **[1]**

11 The Venn diagram shows the number of elements in each region for the sets P, Q and R.

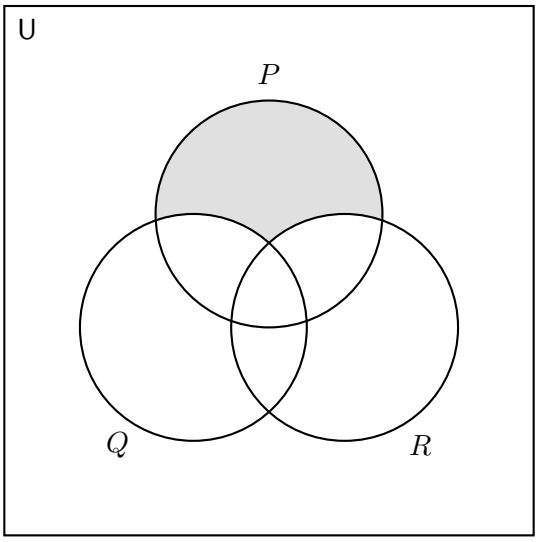

(a) The total number of elements in the universal set is 45.
Form an equation in terms of x and solve it to find the value of x.

$x =$ ..... **[3]**

(b) Find $n(P \cup Q)$.

..... **[1]**

(c) On the Venn diagram below, shade the region $P \cap (Q \cup R)'$.

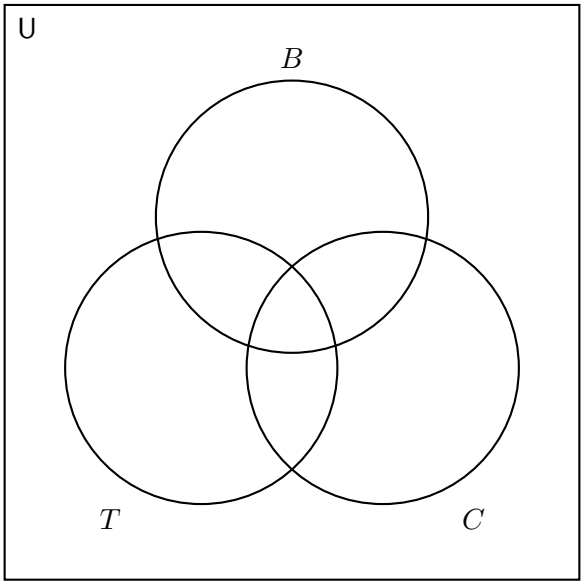

[1]

12 In a survey of 103 people, the following information was recorded about their use of three types of transport: Bus (B), Train (T), and Car (C).

- 15 people use all three types.
- 28 people use both a Train and a Car.
- 22 people use both a Bus and a Car.
- 30 people use both a Bus and a Train.
- x people use only a Bus.
- The number of people who use only a Train is twice the number of people who use only a Bus.
- The number of people who use only a Car is 5 more than the number of people who use only a Bus.
- 8 people do not use any of these types of transport.

(a) Complete the Venn diagram in terms of x to show this information.

[3]

(b) Find the value of x.

$x =$ ..... **[2]**

(c) Find $n(T \cup C)$.

..... **[1]**

(d) A person is chosen at random from those who use a Train.
Find the probability that this person also uses a Car but does not use a Bus.

..... **[2]**

1 **(a)** 2, 3, 5, 7 **[B1]**

(b) 1, 2, 3, 4, 6, 12 **[B1]**

(c) 8 **[B1]**

(d) 2, 3 **[B1]**

(e) 8 or 9 or 10 **[B1]**

[Back to Question] *[Total Marks: 5]*

2 **(a)** Intersection: $3, 5, 7$ **[B1]**

Remainder of diagram correct: A only region has 2; B only region has $1, 9$; Outer region has $4, 6, 8, 10$ **[B1]**

(b) 2 **[B1]**

(c) 6 **[B1]**

(d) $A \cap B'$ **[B1]**

[Back to Question] *[Total Marks: 5]*

3 **(a)** Intersection: x and Outer region: 4 **[B1]**

P only region: $28 - x$ AND C only region: $22 - x$ **[B1]**

(b) $(28 - x) + x + (22 - x) + 4 = 45$ oe **[M1]**

$x = 9$ **[A1]**

(c) 19 **[B1]**

[Back to Question] *[Total Marks: 5]*

4 **(a)** 5 in outer region **[B1]**

8 in intersection **[B1]**

17 in F only AND 10 in S only **[B1]**

(b) 17 **[B1]**

(c) $\frac{27}{40}$ **[B2]**

M1 for $17 + 10$ or 27 seen **[M1]**

(d) $\frac{8}{25} \times \frac{7}{24}$ **[M1]**

$\frac{7}{75}$ **[A1]**

[Back to Question] *[Total Marks: 7]*

5 **(a)** Intersection of all three: 8 AND Outer region: 3 **[B1]**

Two-set only intersections: 12, 7, and 10 in correct regions **[B1]**

Single set regions: x (in C), $2x$ (in D), and x (in B) **[B1]**

(b) $x + 2x + x + 8 + 12 + 7 + 10 + 3 = 100$ oe **[M1]**

$x = 15$ **[A1]**

(c) Identifies the regions required: Only C + Only D + ($C \cap D$ only) OR uses $x + 2x + 12$ **[M1]**

57 **[A1]**

[Back to Question] *[Total Marks: 7]*

6 **(a)** 4 in center intersection **[B1]**

8, 5, 7 in the two-sport intersections **[B1]**

13, 9, 9 in the one-sport regions AND 5 in outer region **[B1]**

(b) 5 **[B1]**

(c) 17 **[B1]**

(d) $B \cap T' \cap S'$ or $B \cap (T \cup S)'$ **[B2]**

M1 for $B \cap \ldots$ **[M1]**

[Back to Question] *[Total Marks: 7]*

7 **(a)** $1, 2, 3, 6, 9$ **[B1]**

(b) $2, 3$ **[B1]**

(c) 3 **[B2]**

Partial working: Correctly identifies elements in the union $\{1, 2, 3, 5, 6, 7, 9\}$ OR elements outside $\{4, 8, 10\}$ **[M1]**

(d) $\notin$ **[B1]**

[Back to Question] *[Total Marks: 5]*

8 **(a)** 7 **[B3]**

Partial working: Correct simplified equation $7x + 3 = 52$ **[M2]**

Partial working: Sets up unsimplified sum $(2x + 1) + x + (3x - 2) + (x + 4) = 52$ **[M1]**

(b) 33 **[B2]**

Partial working: Evaluates correct sub-regions for $x = 7$ (e.g. $15 + 7 + 11$) OR identifies correct algebraic expression $4x + 5$ **[M1]**

(c) Region strictly inside A but outside B is shaded (the left crescent) **[B1]**

[Back to Question] *[Total Marks: 6]*

9 **(a)** All 8 regions correctly populated **[B3]**

Partial working: 5 to 7 regions correctly populated **[B2]**

Partial working: 3 to 4 regions correctly populated (e.g. places $12, 15, x$ correctly) **[B1]**

(Correct values are: Center $= 12$. $M \cap D$ only $= 13$. $D \cap A$ only $= 20$. $M \cap A$ only $= 16$. M only $= 9$. D only $= 20$. A only $= x$. Outside $= 15$)

(b) 15 **[B2]**

Partial working: Forms correct sum $9 + 20 + x + 13 + 16 + 20 + 12 + 15 = 120$ OR $105 + x = 120$ **[M1]**

(c) 70 **[B2]**

Partial working: Identifies the 20 students in only Drama and Art OR correctly calculates $50 + 20$ **[M1]**

(d) Region strictly inside M but outside both D and A is shaded (the top crescent / "only M" region) **[B1]**

[Back to Question] *[Total Marks: 8]*

10 **(a)** Correct elements in all four regions: 2 in the intersection, $4, 6, 8, 10$ in A only, $3, 5, 7$ in B only, and $1, 9$ outside both circles **[B2]**

If 0 scored, allow [B1] for 2 or 3 correct regions

(b) $\{2\}$ or 2 **[B1]**

(c) 2 **[B1]**

[Back to Question] *[Total Marks: 4]*

11 **(a)** Summing all regions: $(x + 5) + 2x + x + 3 + 4 + 2 + 5 + (x + 1) = 45$ (or equivalent) **[M1]**

$5x + 20 = 45 \implies 5x = 25$ **[M1]**

$x = 5$ **[A1]**

(b) 34 **[B1]**

(c) Shading exactly the region representing P only (the top part of circle P, excluding the intersections with Q and R) **[B1]**

[Back to Question] *[Total Marks: 5]*

12 **(a)** Places 15 in the central intersection **[B1]**

Places 15 in $B \cap T$ only, 13 in $T \cap C$ only, and 7 in $B \cap C$ only **[B1]**

Places x, $2x$, $x + 5$, and 8 in the respective remaining regions (B only, T only, C only, and outside the sets) **[B1]**

(b) $x + 2x + (x + 5) + 15 + 15 + 13 + 7 + 8 = 103 \implies 4x + 63 = 103$ (or equivalent valid method) **[M1]**

$x = 10$ **[A1]**

(c) 85 **[B1]**

(d) $\frac{13}{63}$ **[B2]**

If 0 scored, allow [M1] for correctly identifying the denominator $n(T) = 63$ or the numerator $n(T \cap C \cap B') = 13$

[Back to Question] *[Total Marks: 8]*
