---

1 The universal set U contains all integers from 1 to 10 inclusive.
Set A contains all the even numbers in U.
Set B contains all the prime numbers in U.

(a) Complete the Venn diagram to show the elements of these sets.

[2]

(b) List the elements of $A \cap B$.

..... **[1]**

(c) Find $n(A \cup B)'$.

..... **[1]**

2 $\mathsf{U} = \{x : x \text{ is an integer and } 1 \leq x \leq 10\}$
$A = \{x : x \text{ is a prime number}\}$
$B = \{x : x \text{ is a factor of } 12\}$

(a) List the members of set A.

..... **[1]**

(b) List the members of set B.

..... **[1]**

(c) Find $n(A \cup B)$.

..... **[1]**

(d) Write down the elements of $A \cap B$.

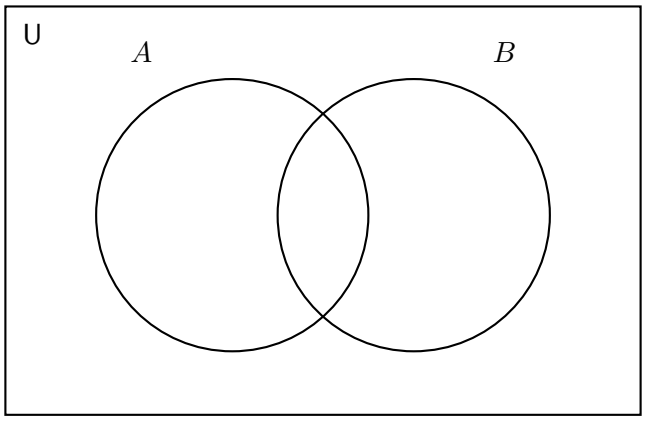

..... **[1]**

(e) Write down a number that is in U but is not in $A \cup B$.

..... **[1]**

3 Let U be the set of integers from 1 to 10 inclusive.
Let A be the set of prime numbers.
Let B be the set of odd numbers.

(a) Complete the Venn diagram to show the elements of these sets.

[2]

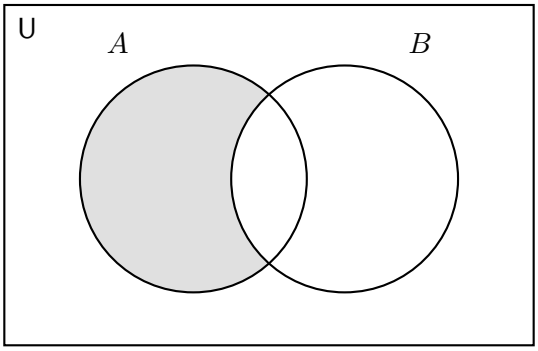

(b) List the elements of $A \cap B'$.

..... **[1]**

(c) Find $n(A \cup B)$.

..... **[1]**

(d) Write down the set notation for the shaded region in the Venn diagram above.

..... **[1]**

4 The universal set U and sets P and F are defined as follows:

- $\mathsf{U} = \{x : x \text{ is an integer} 1 \leq x \leq 10\}$
- $P = \{x : x \text{ is a prime number}\}$
- $F = \{x : x \text{ is a factor of } 18\}$

(a) Write down the elements of set F.

$F = \{$ ..... $\}$ **[1]**

(b) List the elements of $P \cap F$.

$P \cap F = \{$ ..... $\}$ **[1]**

(c) Find $n((P \cup F)')$.

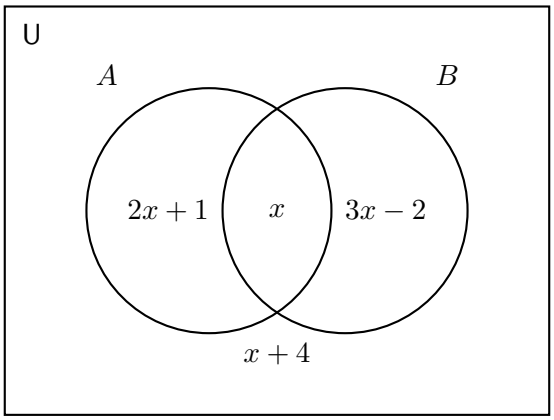

..... **[2]**

(d) Write down the correct set symbol, $\in$ or $\notin$, to make this statement true:

$5 \ldots\ldots F$

[1]

5 The Venn diagram shows the number of elements in sets A and B, in terms of x.
U is the universal set and $n(\mathsf{U}) = 52$.

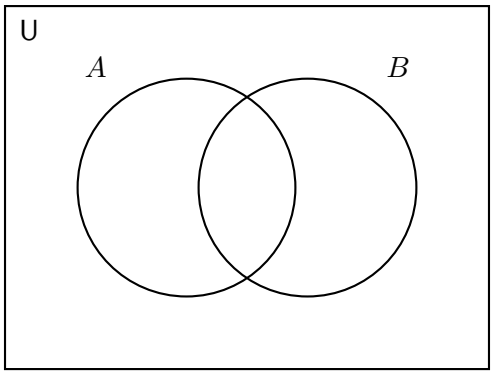

(a) Form an equation in x and solve it.

$x =$ ..... **[3]**

(b) Find $n(A \cup B')$.

..... **[2]**

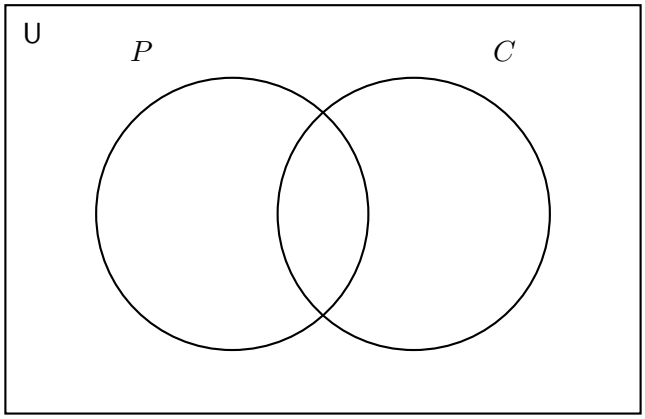

(c) On the Venn diagram below, shade the region $A \cap B'$.

[1]

6 There are 45 students in a class.
Let U be the set of students in this class.
Let P be the set of students who study Physics.
Let C be the set of students who study Chemistry.
$n(P) = 28$
$n(C) = 22$
$n(P \cap C) = x$
$n((P \cup C)') = 4$

(a) Complete the Venn diagram in terms of x.

[2]

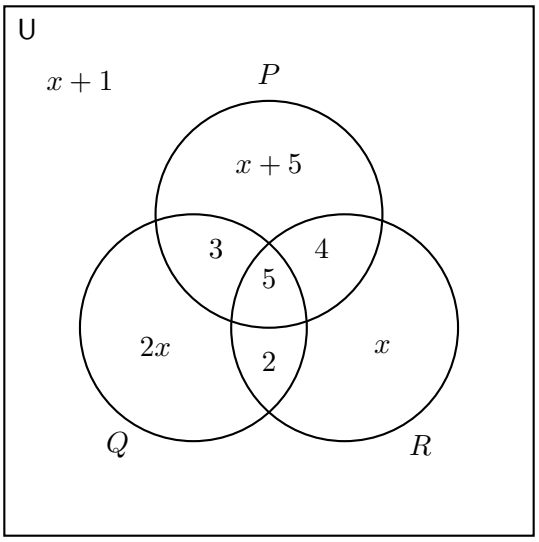

(b) Form an equation in x and solve it to find the value of x.

$x =$ ..... **[2]**

(c) Find $n(P \cap C')$.

..... **[1]**

7 The Venn diagram shows the number of elements in each region for the sets P, Q and R.

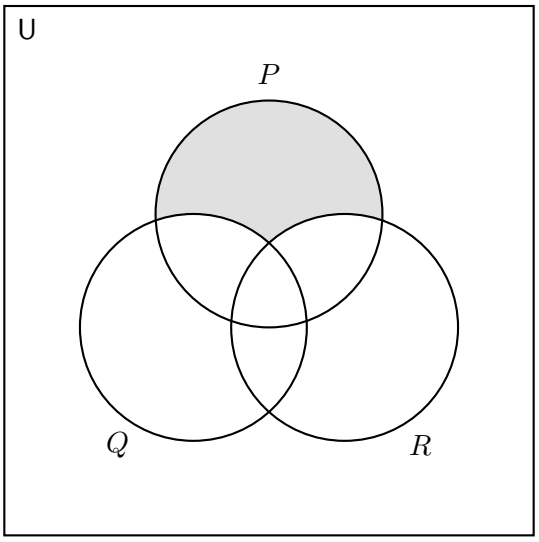

(a) The total number of elements in the universal set is 45.
Form an equation in terms of x and solve it to find the value of x.

$x =$ ..... **[3]**

(b) Find $n(P \cup Q)$.

..... **[1]**

(c) On the Venn diagram below, shade the region $P \cap (Q \cup R)'$.

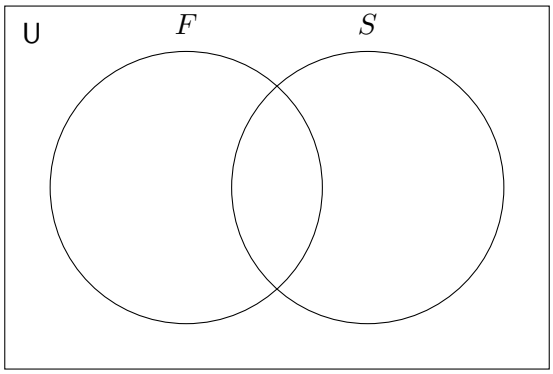

[1]

8 In a class of 40 students:

- 25 study French (F)
- 18 study Spanish (S)
- 5 study neither French nor Spanish

(a) Complete the Venn diagram to show this information.

[3]

(b) Find $n(F \cap S')$.

..... **[1]**

(c) A student is chosen at random from the class.
Find the probability that they study exactly one of the two languages.

..... **[2]**

(d) Two students are chosen at random from those who study French.
Find the probability that both also study Spanish.

..... **[1]**

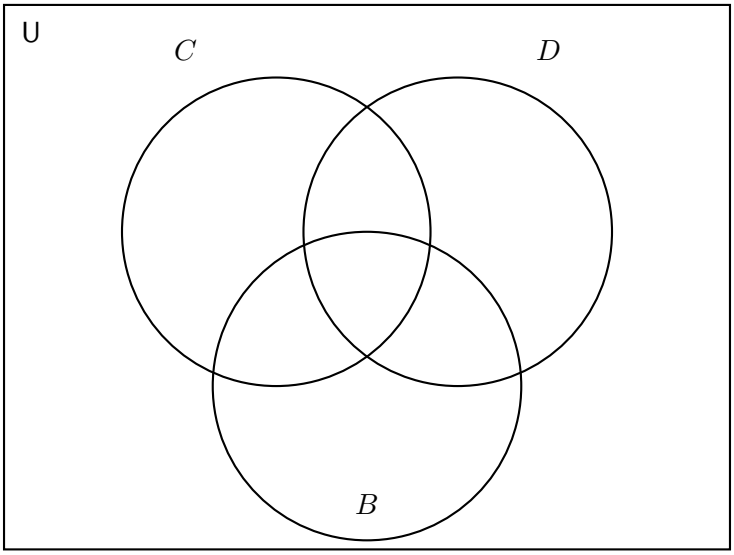

9 In a survey of 100 people, information was collected about the pets they own.

Let U be the set of people surveyed.
Let C be the set of people who own a cat.
Let D be the set of people who own a dog.
Let B be the set of people who own a bird.

- 8 people own all three pets.
- 12 people own a cat and a dog but not a bird.
- 7 people own a cat and a bird but not a dog.
- 10 people own a dog and a bird but not a cat.
- 3 people do not own any of these pets.

The number of people who own only a cat is x.
The number of people who own only a bird is also x.
The number of people who own only a dog is $2x$.

(a) Complete the Venn diagram to show this information.

[3]

(b) Find the value of x.

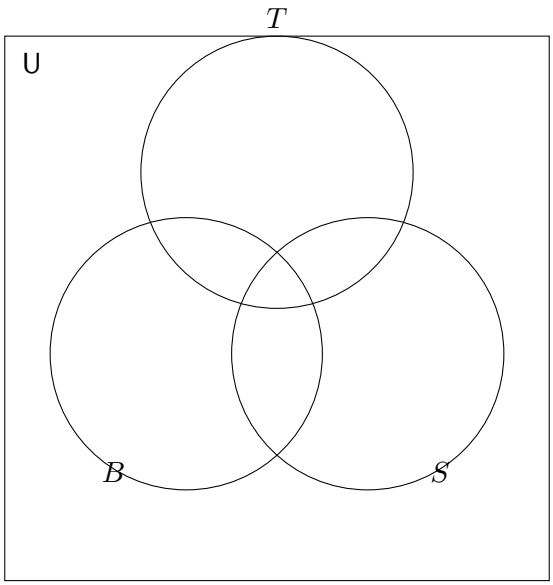

$x =$ ..... **[2]**

(c) Find $n((C \cup D) \cap B')$.

..... **[2]**

10 There are 60 people in a sports club.

- 30 play Tennis (T)
- 28 play Badminton (B)
- 25 play Squash (S)
- 12 play both Tennis and Badminton
- 9 play both Tennis and Squash
- 11 play both Badminton and Squash
- 4 play all three sports

(a) Complete the Venn diagram.

[3]

(b) Find $n(T \cup B \cup S)'$.

..... **[1]**

(c) Find $n(T \cap (B \cup S))$.

..... **[1]**

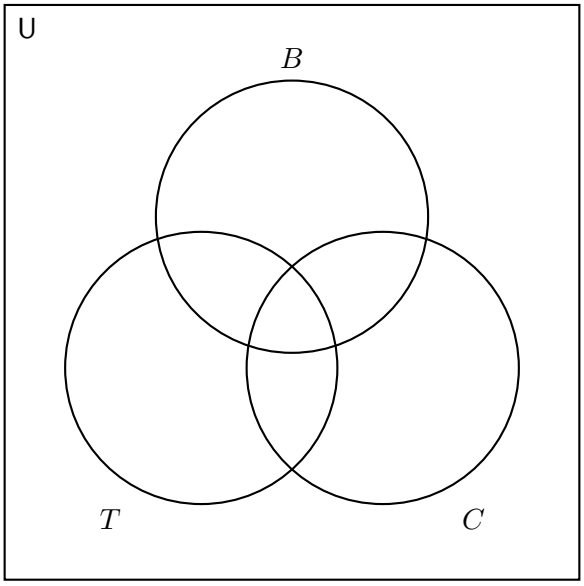

(d) Use set notation to describe the region containing the number 9 (the number of people who play Badminton only).

..... **[2]**

11 In a survey of 103 people, the following information was recorded about their use of three types of transport: Bus (B), Train (T), and Car (C).

- 15 people use all three types.
- 28 people use both a Train and a Car.
- 22 people use both a Bus and a Car.
- 30 people use both a Bus and a Train.
- x people use only a Bus.
- The number of people who use only a Train is twice the number of people who use only a Bus.
- The number of people who use only a Car is 5 more than the number of people who use only a Bus.
- 8 people do not use any of these types of transport.

(a) Complete the Venn diagram in terms of x to show this information.

[3]

(b) Find the value of x.

$x =$ ..... **[2]**

(c) Find $n(T \cup C)$.

..... **[1]**

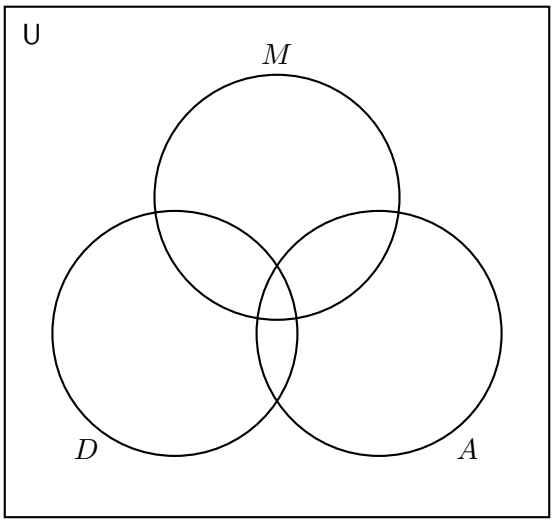

(d) A person is chosen at random from those who use a Train.
Find the probability that this person also uses a Car but does not use a Bus.

..... **[2]**

12 In a year group of 120 students, they can choose to study Music (M), Drama (D), and Art (A).

- 12 students study all three subjects.
- 25 students study Music and Drama.
- 32 students study Drama and Art.
- 28 students study Music and Art.
- 50 students study Music.
- 65 students study Drama.
- x students study Art only.
- 15 students study none of these three subjects.

(a) Use this information to complete the Venn diagram.

[3]

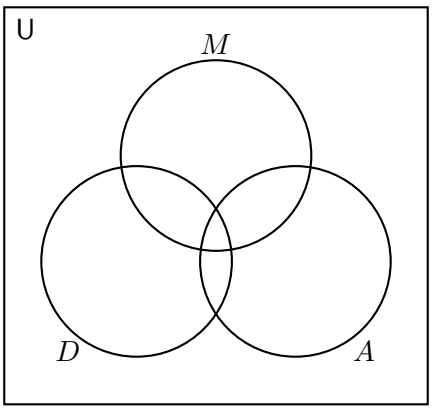

(b) Find the value of x.

$x =$ ..... **[2]**

(c) Find $n(M \cup (D \cap A))$.

..... **[2]**

(d) On the Venn diagram below, shade the region $M \cap (D \cup A)'$.

[1]
