# IGCSE 0607 Practice Questions — E6.1

## Units of measure

**Total Questions:** 9 — **Total Marks:** 53 Marks

---

## Table of Contents & Quick Navigation

- **E6.1** Units of measure
  → **Paper 2 (Non-Calculator)** *(3 Qs)* · **Paper 4 (Calculator)** *(6 Qs)*

---

**1** **(a)** Change 52000 $cm^2$ into $m^2$.

..... $m^2$ **[1]**

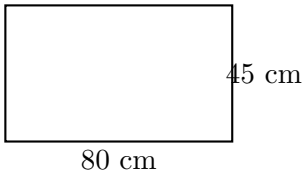

**(b)** Change 4.7 $m^3$ into litres.

..... litres **[1]**

**(c)** Change 850 millilitres into $cm^3$.

..... $cm^3$ **[1]**

**2** A rectangular piece of card and a water jug are being measured.

**(a)** Calculate the area of the rectangular piece of card in square metres ($m^2$).

..... $m^2$ **[2]**

**(b)** The jug holds 3.2 litres of water.
Write down this volume in $cm^3$.

..... $cm^3$ **[1]**

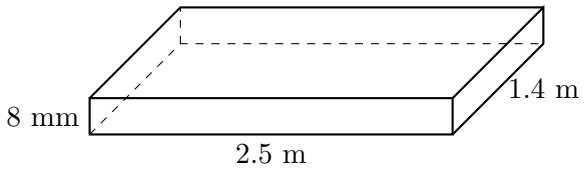

**3** **(a)** Change 3.5 $m^2$ into $cm^2$.

..... $cm^2$ **[1]**

**(b)** A rectangular tank measures 60 $cm$ by 45 $cm$ by 30 $cm$.
Calculate the volume of the tank in litres.

..... litres **[3]**

**4** A rectangular block of metal has length 2.5 m, width 1.4 m and thickness 8 mm.

NOT TO SCALE

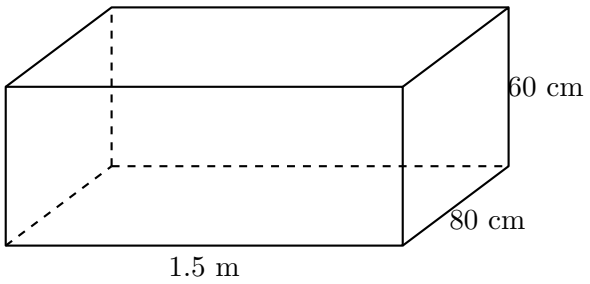

**(a)** Work out the volume of the block of metal in $cm^3$.

..... $cm^3$ **[2]**

**(b)** The mass of 1 $cm^3$ of this metal is 7.8 g.
Work out the mass of the block of metal in kilograms.

..... kg **[2]**

**5** A metal water tank is made in the shape of a cuboid.

**(a)** Calculate the capacity of the water tank in litres.

..... litres **[3]**

**(b)** A solid metal sphere is melted down to make the tank.
The metal sphere has a volume of 0.024 $m^3$.
The mass of 1 $cm^3$ of this metal is 7.8 g.

Calculate the total mass of the sphere, giving your answer in kilograms.

..... $kg$ **[3]**

**6** During a storm, 15 $mm$ of rain falls on a flat rectangular roof measuring 15 $m$ by 12 $m$.

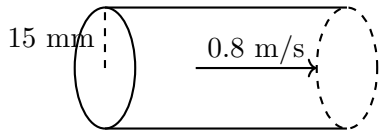

**(a)** Calculate the volume of rain that falls on the roof.
Give your answer in litres.

..... litres **[3]**

**(b)** The water from the roof flows into a cylindrical tank with a base radius of 60 $cm$.
Calculate the increase in the depth of the water in the tank.
Give your answer in centimetres, correct to 1 decimal place.

..... $cm$ **[4]**

**7** Water flows through a cylindrical pipe into an empty rectangular pool.
The pool measures 4 m by 2.5 m.

**(a)** The cylindrical pipe has a radius of 15 mm.
Water flows through the pipe at a speed of 0.8 m/s.

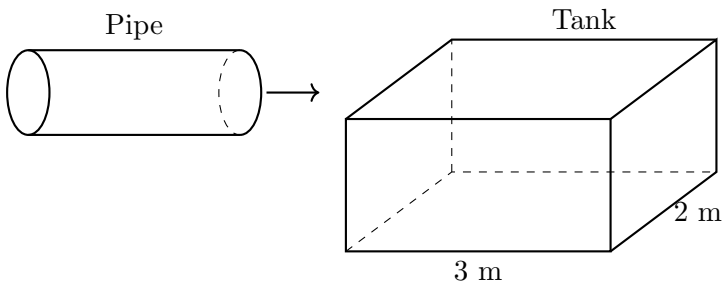

Show that the volume of water flowing out of the pipe in one second is 0.565 litres, correct to 3 significant figures.

**[3]**

**(b)** Calculate the time taken for the depth of water in the pool to reach 1.2 m.
Give your answer in hours and minutes, correct to the nearest minute.

..... hours ..... minutes **[4]**

**8** Water flows through a cylindrical pipe of internal radius 2.5 cm at a speed of 5.4 km/h.
The water flows into an empty rectangular tank of length 3 m and width 2 m.

NOT TO SCALE

**(a)** Show that the volume of water flowing into the tank in 1 minute is 176.7 litres, correct to 1 decimal place.

**[3]**

**(b)** Calculate the depth of the water in the tank after 45 minutes.
Give your answer in centimetres.

..... cm **[4]**

**9** Water flows through a cylindrical pipe of radius 2.5 $cm$ at a speed of 18 $km/h$.

**(a)** Calculate the volume of water, in litres, that flows through the pipe in 1 minute.

..... litres **[5]**

**(b)** The water from the pipe is used to fill an empty rectangular reservoir measuring 50 $m$ by 30 $m$ by 4 $m$.
Calculate the time it takes to fill the reservoir completely.
Give your answer in days and hours, correct to the nearest hour.

days ..... , hours ..... **[7]**
