IGCSE 0607 Practice Questions — E10.8

Cumulative frequency diagrams

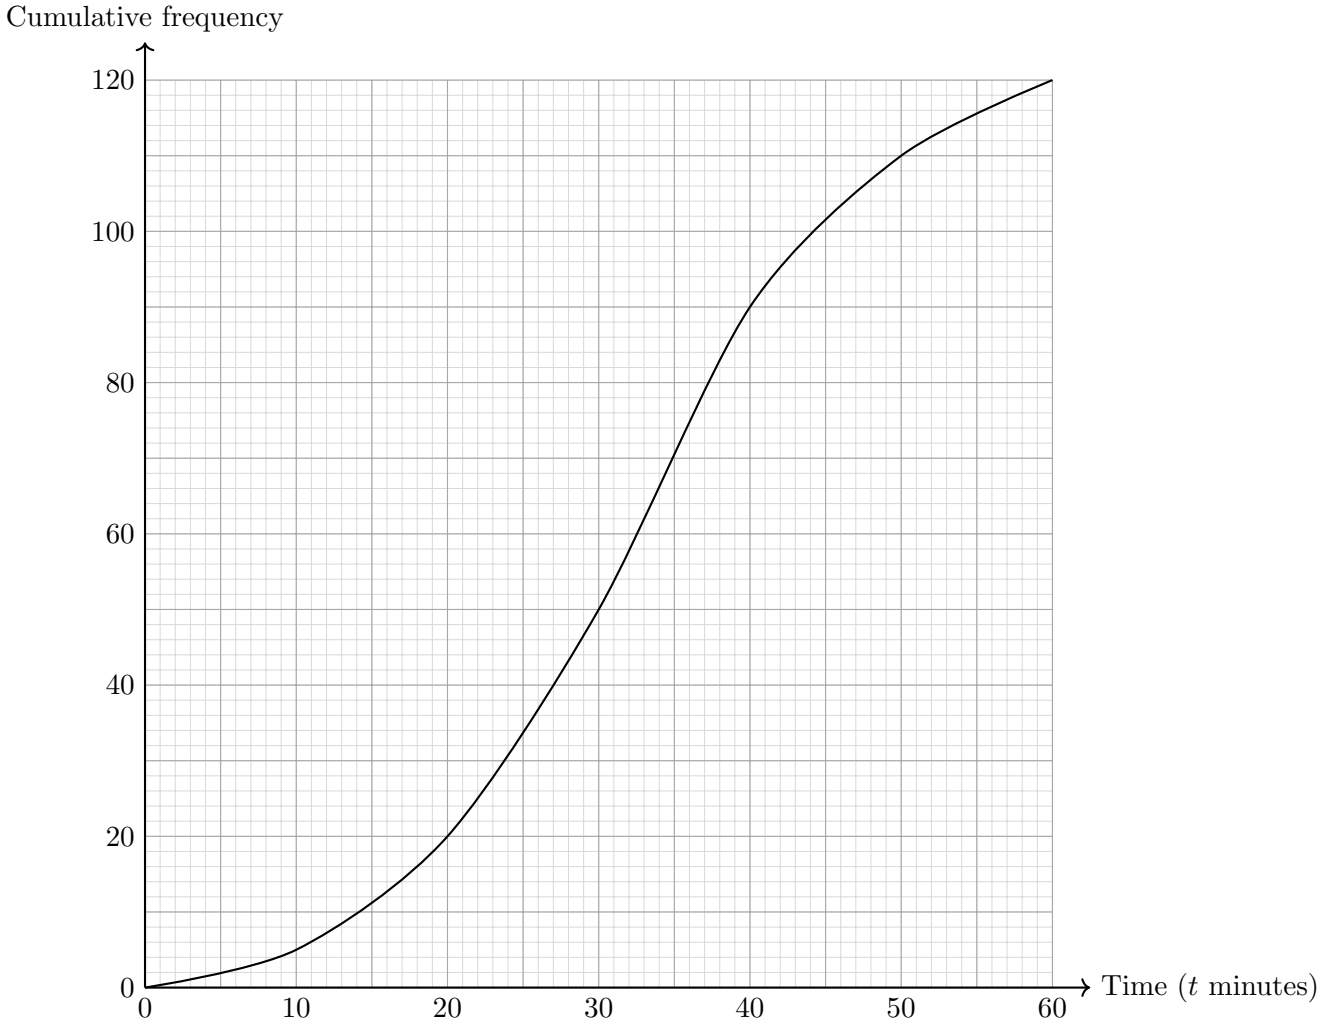

Total Questions: 9 — **Total Marks:** 68 Marks

Table of Contents & Quick Navigation

- **E10.8** Cumulative frequency diagrams
  → **Paper 2 (Non-Calculator)** *(2 Qs)* · **Paper 4 (Calculator)** *(7 Qs)*

---

1 The cumulative frequency diagram shows the times taken, t minutes, by 120 students to complete a test.

(a) Use the diagram to estimate the median time.

..... minutes **[1]**

(b) Use the diagram to estimate the interquartile range.

..... minutes **[2]**

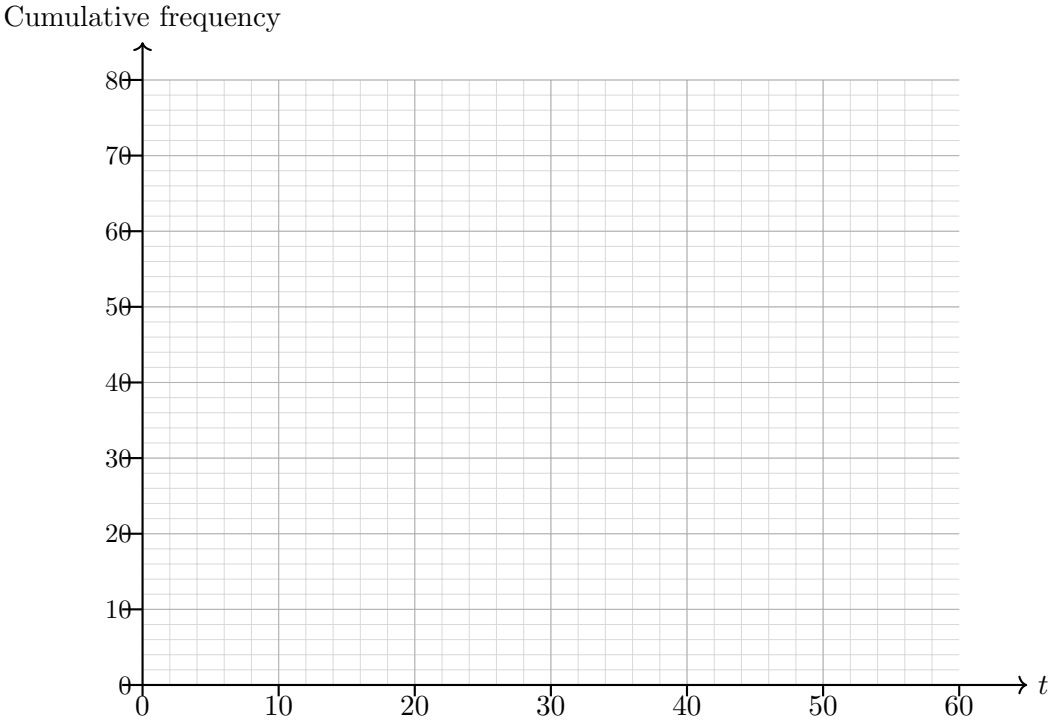

(c) Students who take longer than 45 minutes are given a penalty.
Estimate the number of students who are given a penalty.

..... **[2]**

2 The table shows the cumulative frequencies for the times, t minutes, taken by 80 students to complete a puzzle.

Time (t minutes)	$t \leq 10$	$t \leq 20$	$t \leq 30$	$t \leq 40$	$t \leq 50$	$t \leq 60$
Cumulative frequency	6	22	48	68	78	80

(a) On the grid, draw a cumulative frequency diagram to show this information.

[3]

(b) Use your diagram to estimate the median time.

..... minutes **[2]**

3 A company records the salaries, s thousand dollars, of its 200 employees.
The frequency table shows the results.

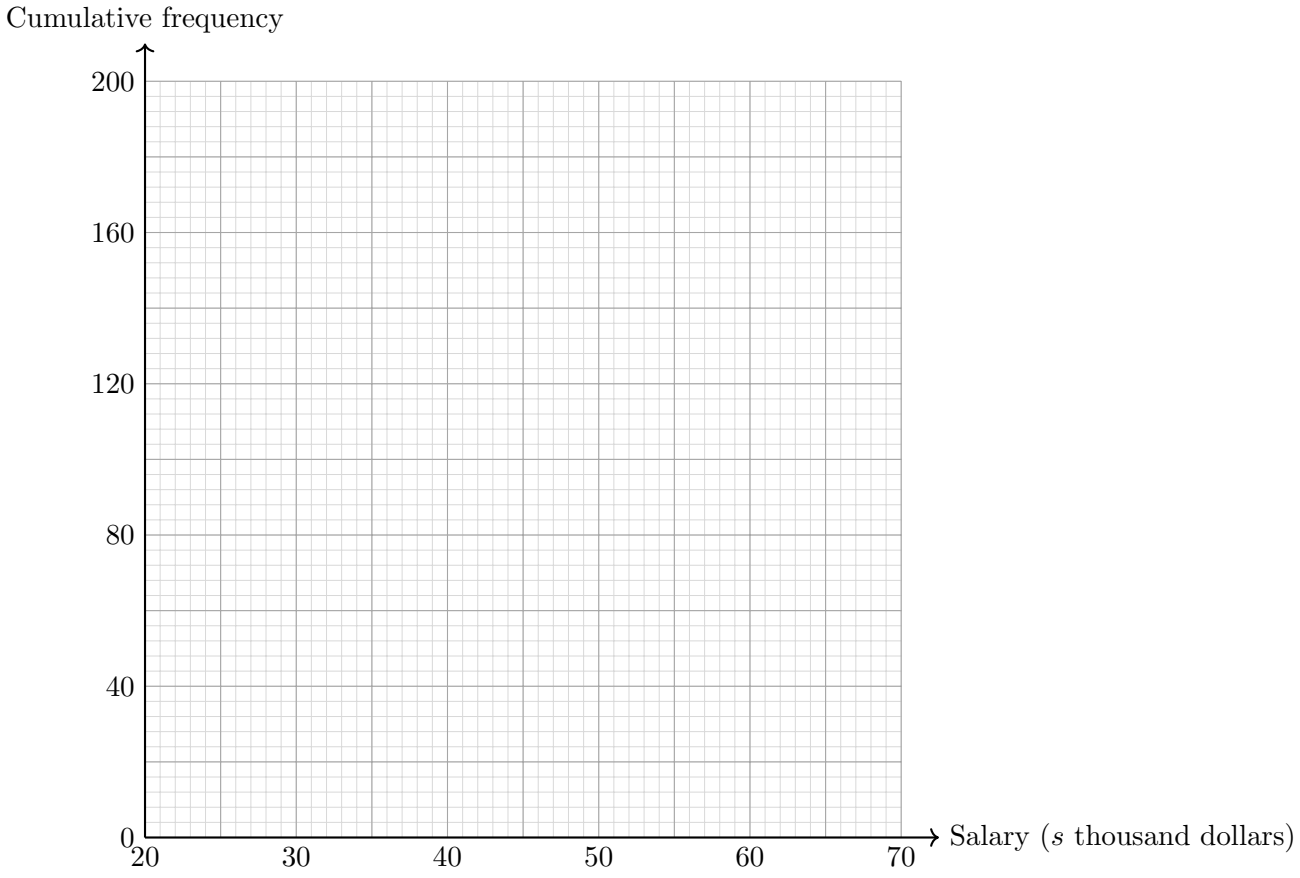

Salary (s thousand dollars)	$20 < s \leq 30$	$30 < s \leq 40$	$40 < s \leq 50$	$50 < s \leq 60$	$60 < s \leq 70$
Frequency	24	66	70	28	12

(a) Complete the cumulative frequency table.

Salary (s thousand dollars)	$s \leq 30$	$s \leq 40$	$s \leq 50$	$s \leq 60$	$s \leq 70$
Cumulative frequency	24				

[2]

(b) On the grid, draw a cumulative frequency diagram to show this information.

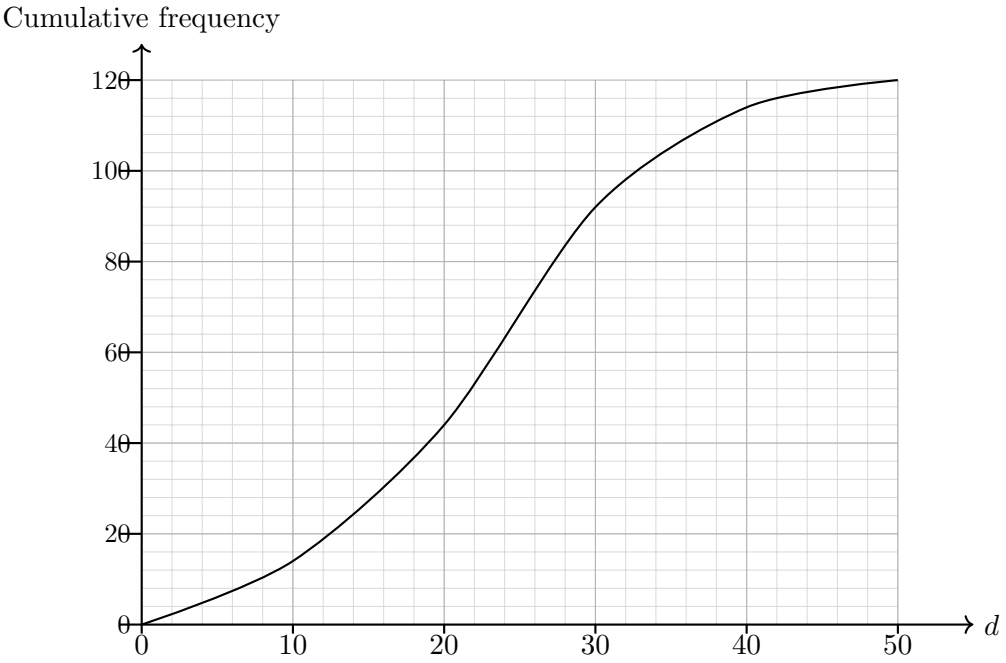

[3]

(c) Use your diagram to estimate the 70th percentile of the salaries.

..... thousand **[2]**

4 The cumulative frequency diagram shows information about the distances, d km, travelled by 120 people to work.

(a) Use the diagram to estimate the median distance.

..... km **[2]**

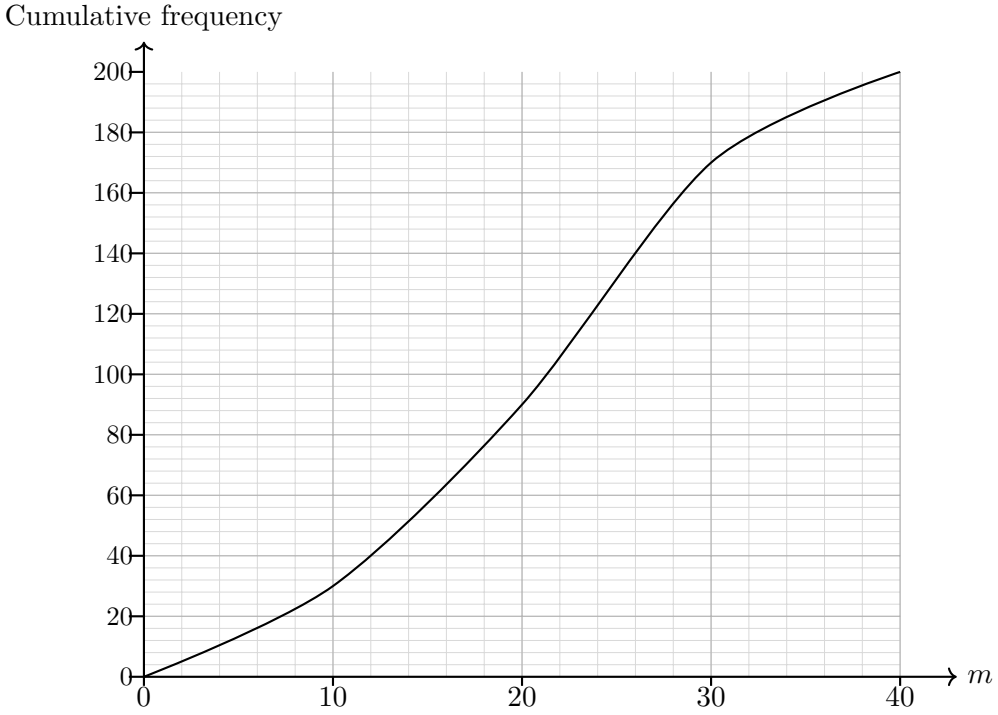

(b) Use the diagram to estimate the interquartile range.

..... km **[3]**

(c) Estimate the number of people who travelled more than 35 km to work.

..... **[3]**

5 The cumulative frequency diagram shows information about the masses, m grams, of 200 parcels.

(a) Find an estimate for the 80th percentile.

..... grams **[2]**

(b) Use the cumulative frequency diagram to complete the frequency table.

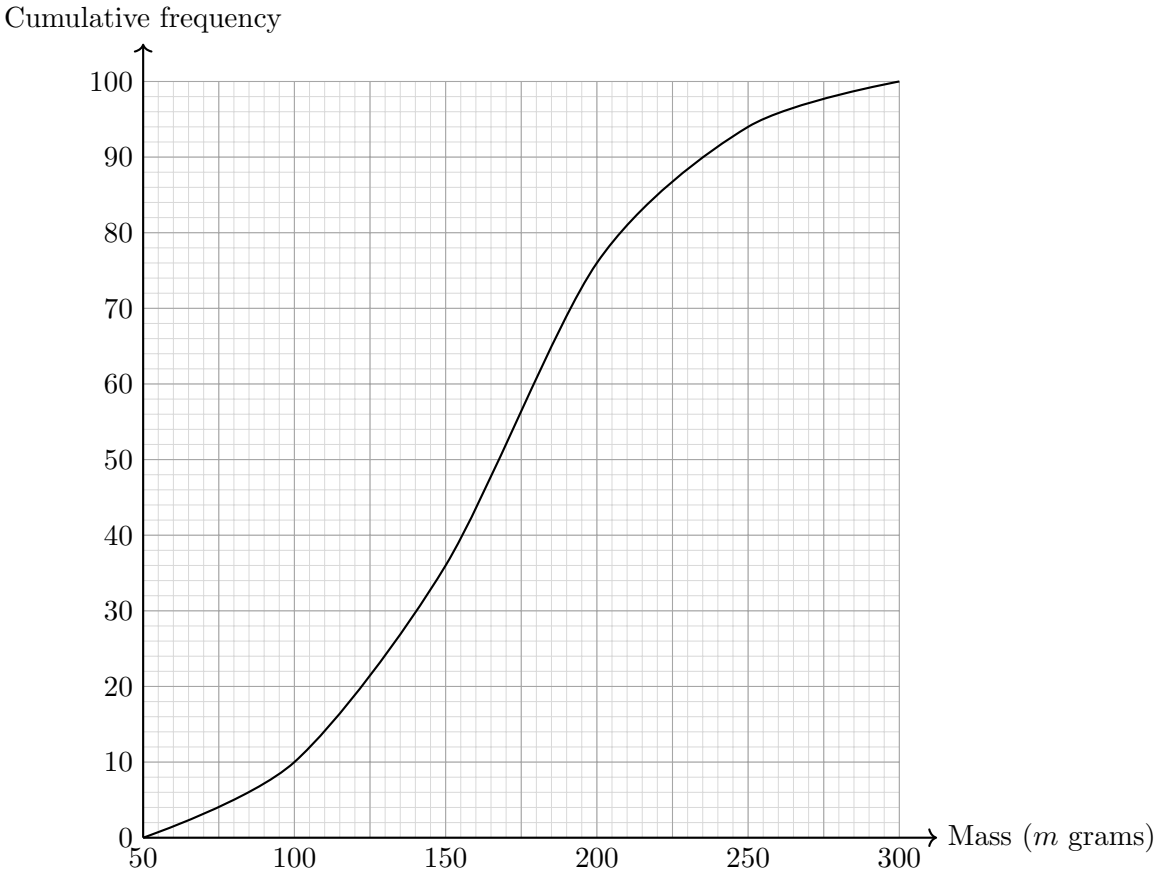

Mass (m grams)	$0 < m \leq 10$	$10 < m \leq 20$	$20 < m \leq 30$	$30 < m \leq 40$
Frequency				

[2]

(c) Calculate an estimate of the mean mass.

..... grams **[4]**

6 The cumulative frequency curve shows information about the masses, m grams, of 100 potatoes.

(a) Use the curve to estimate the number of potatoes with a mass greater than 220 grams.

..... **[3]**

(b) The curve was drawn using grouped data.
Find the values of p, q, and r.

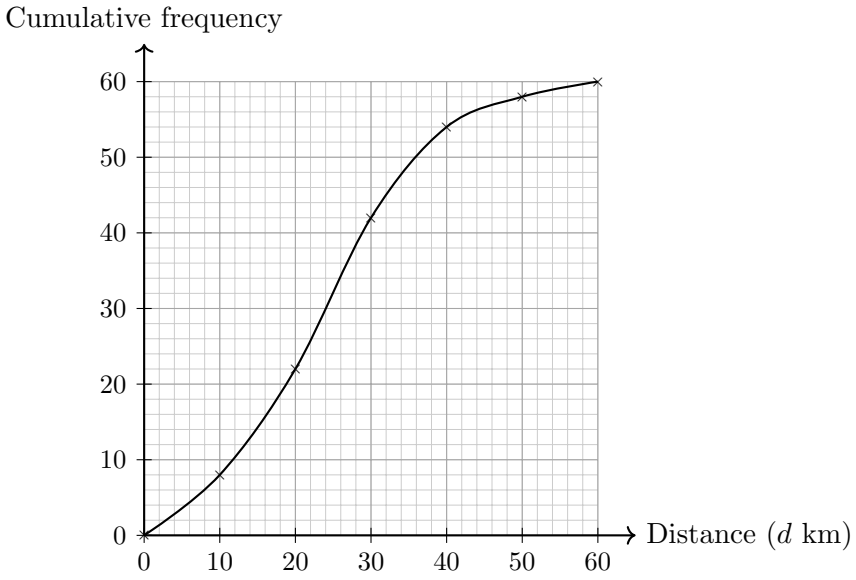

Mass (m grams)	$50 < m \leq 100$	$100 < m \leq 150$	$150 < m \leq 200$	$200 < m \leq 250$	$250 < m \leq 300$
Frequency	p	q	40	r	6

$p =$ ..... , $q =$ ..... , $r =$ ..... **[3]**

(c) Calculate an estimate of the mean mass of the potatoes.

..... g **[3]**

7 The cumulative frequency diagram shows information about the distance, d km, travelled by 60 people to work.

(a) Use the diagram to find an estimate for:

(i) the median,

..... km **[1]**

(ii) the interquartile range.

..... km **[2]**

(b) Find the number of people who travelled more than 45 km to work.

..... **[3]**

8 A table shows information about the masses of 120 apples.

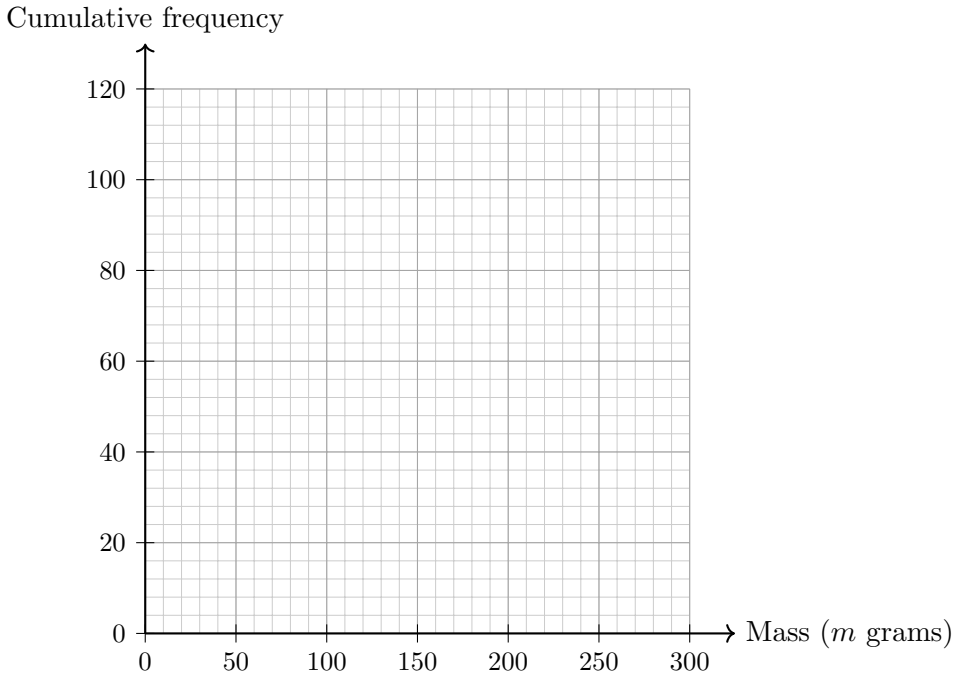

Mass (m grams)	$50 < m \leq 100$	$100 < m \leq 150$	$150 < m \leq 200$	$200 < m \leq 250$	$250 < m \leq 300$
Frequency	12	34	46	20	8

(a) Complete the cumulative frequency table.

Mass (m grams)	$m \leq 100$	$m \leq 150$	$m \leq 200$	$m \leq 250$	$m \leq 300$
Cumulative frequency	12				120

[2]

(b) On the grid, draw a cumulative frequency diagram to show this information.

[3]

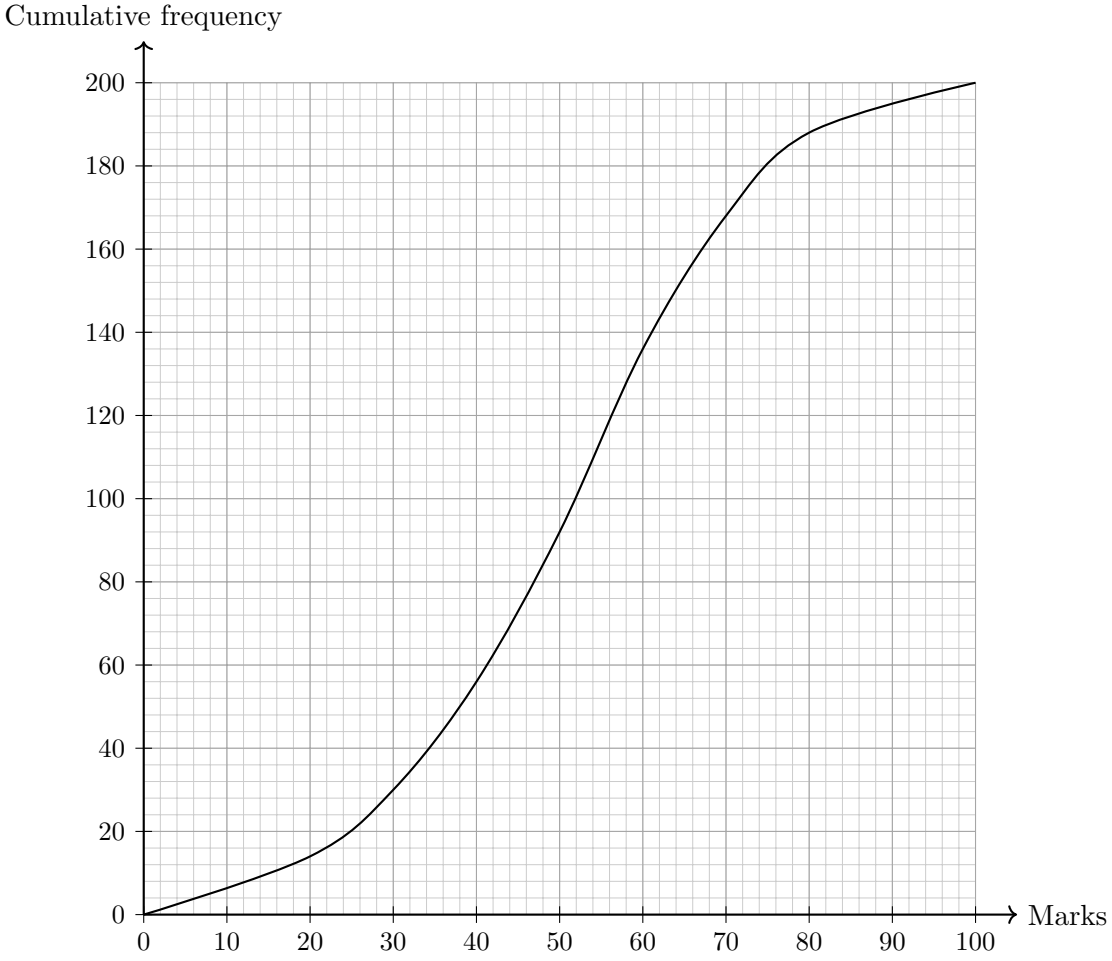

(c) Use your diagram to estimate the 60th percentile.

..... g **[2]**

(d) Apples with a mass greater than 220 grams are classified as large.
Estimate the number of large apples.

..... **[3]**

9 The cumulative frequency diagram shows the distribution of marks scored by 200 candidates in an examination.

(a) Use your graph to estimate the interquartile range.

..... **[2]**

(b) 15% of the candidates score less than m marks.
Find the value of m.

$m =$ ..... **[2]**

(c) Candidates scoring more than P marks are awarded a Distinction.
Given that 30 candidates are awarded a Distinction, find the value of P.

$P =$ ..... **[2]**

(d) Candidates who score less than 45 marks have to take a supplementary test.
Calculate the percentage of candidates who do NOT have to take this test.

..... % **[4]**
